## **DETAILED ACTION**

### ***Status of Claims***

Claim 1 is as originally presented and Claims 2-4 are currently amended.

### ***Priority***

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Examiner's Comment***

For purposes of examination, the examiner interprets Claims 1 and 2 as product claims and Claim 4 as a process claim.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 3 recites the limitation "the mineral from which the metallic values are to be leached" in lines 4 and 5. There is insufficient antecedent basis for this limitation in the claim.

Art Unit: 1793

Claim 1 or 2 do not recite a mineral. Additionally, "the metallic values" is broader than silver and gold.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by the publication by Urbanski et al.

Urbanski et al is applied to claim 1 for reasons as discussed in the office action mailed 01/05/2009. Regarding Claim 3, the leaching and electrowinning in Urbanski are concurrent with determining thiourea concentration (pages 139-140).

Claim 4 is rejected under 35 U.S.C. 102(b) as being anticipated by Urbanski et al.

Urbanski et al is applied as discussed in the office action mailed 01/05/2009.

***Claim Rejections - 35 USC § 103***

Claims 2 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Urbanski et al as applied to claim 1 above, and further in view of GB 2,349,876.

Urbanski et al in view of GB '876 is applied as discussed in the office action mailed 01/05/2009. Claim 3 is discussed above.

### ***Response to Arguments***

Applicant's arguments filed 9/21/2009 have been fully considered but they are not persuasive. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., electrolytic oxidation to RSSR (or FADS) exclusively, direct electrowinning, electrolytic production and electrowinning with the same energy, and no introduction of an external oxidant) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). A reference may be relied upon for all that it would have reasonably suggested to one having ordinary skill the art, including nonpreferred embodiments. Additionally, nonpreferred and alternative embodiments constitute prior art; disclosed examples and preferred embodiments do not constitute a teaching away from a broader disclosure or nonpreferred embodiments. See MPEP § 2123.

Applicant's arguments with respect to the rejection of Claims 1, 2 and 4 under 35 U.S.C 102(d) have been fully considered and are persuasive. The rejection of the claims has been withdrawn because the priority documents were filed on 2/3/2006 according to PCT/DO/EO/903 mailed 8/20/2007.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Regarding the subject matter in Claim 3, the kinetics of gold electrowinning are studied on various cathodes, including Pt, stainless steel and graphite (page 146, lines 19-24 and Table 2).

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
